Kensington

Outdoor lighting structure that consists of one basic module and that lends itself to being expanded with the addition of Extension Modules suited to form straight or angled walls.Total structure length must be specified at the moment of the order. Lighting fixtures must be ordered separately, specifying their position according to the project previously agreed. The self supporting structure is made from aged brass elements and is provided with all accessories for installation on the lawn. The area may be paved with wood, stone or simple grass. Ideal for villas and parks, the structure lends itself to being covered with climbing plants, or draped with towels.
